The Jon Buoy Inflatable Rescue Sling is specifically designed for the quick and easy recovery of a waterborne casualty. Packing neatly into an easily stowable hard case, the versatile fitting allows it to be attached to any suitable boat or land based fixture. The weight of the pouch allows an accurate throw to the casualty of up to 36 metres. Upon contact with the water the sling automatically inflates and comes with retro-reflective tape and an automatic light can be fitted as an option. Safe working load of 175kg.

The Jon Buoy range also incorporates innovative Glo Lite technology. Glo Lite use retroreflective technology that significantly enhances the visibility of the hi-vis fabric, making it high reflective and increases perception during dark conditions, thus aiding location, leading to reduced casualty time before recovery for a more positive rescue outcome.

KEY FEATURES

- Glo Lite fabric technology
- Water activated inflation
- Automatic light optional
- Retro-reflective tape
- SWL 175kg
- 36m of 8mm floating polypropylene line
- Retro-reflective tape
- Simple & fast deployment process
- Clear printed instructions
- Compact and easy to store
- Versatile mounting system
- 5 year warranty
- 1 year service period
